

AGRITERRA **ULTRA.** THE ULTIMATE TRAILER TIRE.

THE NEXT GENERATION OF TRAILER TIRES

The Mitas Agriterra Ultra range represents a breakthrough in agricultural transport performance, combining cutting-edge design with superior durability and efficiency. Engineered for today's high-capacity trailers, tankers, and spreaders, Agriterra Ultra tires deliver outstanding traction, reduced soil compaction, and extended service life - maximizing productivity across every terrain.

Thanks to their low rolling resistance and excellent self-cleaning properties, Agriterra Ultra tires help you save fuel and working time while maintaining optimal grip and control. Available in a wide range of sizes, tread patterns, and load capacities, the Mitas Agriterra Ultra is built to meet the toughest demands of modern farming operations.

AGRITERRA ULTRA

AGRITERRA ULTRA
SOIL PROTECTOR

ULTRA CONSTRUCTION FOR SUPERIOR PERFORMANCE

At the core of the Agriterra Ultra range lies its advanced Ultra Construction, a robust casing design engineered to handle the heaviest loads with ease while ensuring optimal stability and ride comfort. The optimized tread geometry, combined with a wider footprint, enhances flotation and minimizes soil disturbance, while also improving wear resistance on the road. This construction not only boosts overall performance but also extends tire's life, helping you get the most out of every journey, season after season.

Advanced bead
construction

Innovative carcass
construction and cord
material

Enhanced
compounds

Ultra structure reduces stress and heat generation in the bead area, ensuring greater stability and reliability under demanding load conditions.

AGRITERRA ULTRA. ENGINEERED FOR ALL TRAILER EQUIPMENT

Key benefits

HIGH LOAD
AND HIGH SPEED
CAPACITY

HIGH SOIL
PROTECTION

GREAT
SELF-CLEANING

HIGH
STABILITY

LOW NOISE
EMISSION AND
VIBRATION

EXTENDED
LIFESPAN

Agriterra Ultra is designed to equip a wide range of agricultural trailers, available in distinct tread profiles tailored through specific sizes. Each tread design features unique characteristics, yet all share the same core strengths: excellent ground adaptation, high load capacity, and reliable performance at speed—all backed by outstanding durability.

Whether the task involves transport, spreading, or heavy-duty hauling, Agriterra Ultra provides the right tread for every application, ensuring the perfect match for each type of equipment.

Characterized by larger footprint and a rounded shoulder, ideal on road, field and grassland application.

Sizes:

500/60 R 22.5 IMP	620/40 R 22.5 IMP	650/65 R 26.5 IMP
560/45 R 22.5 IMP	710/45 R 22.5 IMP	710/50 R 26.5 IMP
560/60 R 22.5 IMP	620/75 R 26 IMP	800/45 R 26.5 IMP
560/60 R 22.5 IMP HD	600/55 R 26.5 IMP	710/50 R 30.5 IMP
600/50 R 22.5 IMP	650/55 R 26.5 IMP	850/50 R 30.5 IMP

The large space between the lugs increases the self-cleaning properties, making this tread pattern suitable for on-road application.

Sizes:

680/60 R 30.5 IMP
750/60 R 30.5 IMP

The rounded shoulder and the large space between the lugs get as result a tire ideal for grassland and muddy terrain.

Sizes:

600/60 R 30.5 IMP
800/65 R 32 IMP

SOIL PROTECTOR – VF TECHNOLOGY FOR OPTIMAL SOIL PRESERVATION

The Agriterra Ultra Soil Protector features advanced Very High Flexion (VF) technology, offering up to 40% greater load capacity at the same inflation pressure compared to standard radial tires. By operating at lower pressures, it minimizes soil compaction, preserving soil structure and improving crop yield over time. Perfectly suited for trailers handling heavy loads in the field, the Agriterra Ultra Soil Protector excels on both rough terrains and roads, providing reliable performance at speeds of up to 65 km/h. Whether you're transporting heavy materials or spreading, this tire offers the ideal combination of durability, flotation, and stability.

Increased soil protection due to larger footprint area and less compaction due low pressure on the soil.

Sizes:

VF 500/60 R 22.5 IMP	VF 600/55 R 26.5 IMP

ULTRA TECHNOLOGY FOR ULTIMATE CONVENIENCE

Agriterra Ultra is designed with innovative solutions that enhance operational efficiency and reduce costs for the operator, both in the field and on the road. Its exceptionally low rolling resistance leads to significant fuel savings, reducing overall fuel consumption and minimizing harmful emissions. The unique tread design is specifically crafted to expel soil trapped between the lugs during tilling, ensuring optimal traction at all times. This feature not only maintains superior grip on various terrains but also prevents soil from spilling onto the road during transport, alleviating the need for farmers to restore road conditions.
